

Electronic Monitoring Guidelines **Bethel Community Watch Program**

1) Land line phone service ONLY.

(For very specific reasons, the electronic monitoring equipment is not compatible with Cellular, Cable (Mediacom, Charter), Internet (Vonage) type telephone systems)

The land line must be a clear line, NO DSL, Call Waiting, Call Forwarding, Answering services (voice mail), Answering machines, 3 way calling, lines splitters or multiple jack adapters, or any other auxiliary services.

Must be a regular phone jack (usually mounted on wall or baseboard) into which we can plug our wired telephone. Jacks must be within 10 feet of where the equipment will be installed. Once installed the equipment can not be unplugged or moved by anyone in the residence.

Phone use at the residence of install must be limited to 5 minutes per phone call to avoid missing monitoring calls. (Internet usage on the phone line is strictly prohibited.)

*****The Above Requirements Are Not Unique To Bethel Community Watch Program, But Are Standards Nationwide*****

- 2) 110 VAC power jack (regular home power outlet) within 10 feet of where the equipment will be installed.
- 3) \$132 up front costs (time of installation) = \$112 for first week of service (\$16 per day) + \$20 installation fee.
 - a. \$112 payable in advance for each week thereafter mailed to:
BCWP, 23 Mesaba Avenue, Duluth, MN 55806

Your payment should be paying for the next week of service. Falling behind may jeopardize your ability to continue on the monitor.
